Western Partitions, Inc.
14407 32nd St E
Sumner, WA 98390

Gentlemen:

Congratulations! Your company has been selected as Rushforth Construction's Safety Subcontractor of the month. Each month we look around all of our projects to see which of our subcontractors best exemplifies our goal of providing a safe worksite. There have been months where we did not select a sub of the month because our expectations were not met. However, that is not the case this month.

We are pleased to announce that Western Partitions has been selected as our safety sub of the month based on the outstanding safety measures put in place and followed by your crew on the Tacoma Place Façade Upgrade project.

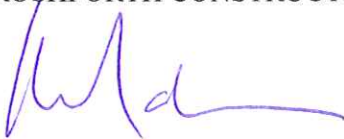

The idea for a Safety Subcontractor of the Month award came from our Safety Committee. Field members of the committee have brought to our attention that there ought to be a way to positively recognize those subcontractors that practice the kind of safety that we want to see on our projects.

Therefore, when we see a subcontractor that really understands the importance of safety and that has made safety one of the company's core values for performing its' work, we want to recognize that effort. We believe that Western Partitions has demonstrated that it is leading the way when it comes to subcontractor safety. To recognize that leadership and excellent safety performance, we have enclosed a Safety Award Certificate and some hardhat stickers for the workers and supervisors that participated in the work on the above project.

Western Partitions is setting a great safety example for other subs to follow. Please pass along our commendation to your crews and safety leader.

We are committed to Zero Injuries!

Sincerely,
RUSHFORTH CONSTRUCTION CO., INC.

Kim Nakamura
