

FIREPROOFING DIVISION

Client References

Genentech – Hillsboro, OR

"I just wanted to send a brief note expressing my thanks for your performance on the Structural Steel Fireproofing scope on the Genentech Hillsboro Fill & Finish Facility. Given the tight schedule, the winter application, and the extensive patching and fall back work required, your team performed exceptionally and was a major contributor in ensuring our delivery of the project ahead of schedule and under budget. Your Safety performance was good, your team cooperative and well trained, and your pricing to be fair and reasonable.

Since my first experience with your team at the VA Cancer Research project clear back in 1998, I have always been pleased with your performance. I look forward to future work with you. Feel free to use me as a reference anytime."

*Cliff McDonald, Construction Manager
Hoffman Construction of Oregon

"We are closing out the project and I wanted to thank you for your dedicated support. WPI did an excellent job with the project fireproofing scope. The quality in the field has been excellent as has your service and ability to manage the schedule. I look forward to working with you again in the future."

*Stephen Allen, CSA Lead
Hoffman Construction

"I loved having you on our job" "If I had another job with fireproofing on it, I would like it to be with Western Partitions."

*Ron Anders, Field Superintendant
Hoffman Construction
(971)255-6779*

Good Sam Hospital – Portland, OR

"I just wanted to send a quick note expressing my appreciation for your fireproofing crew here at Good Sam Hospital. They did an excellent job, were always on time, finished ahead of schedule and despite having the messiest job, were the cleanest subcontractor onsite. Your foreman, Chris, was very professional and conscientious about doing his job and completing his paperwork. The entire crew did a great job, and it was a privilege to have them onsite. I wish more of our subcontractors had the same attitude and pride in their work as your crew. I hope to work with them again."

*Ted Sparks, Superintendent
Howard S. Wright Construction Co.

Providence Cancer Center Project – Portland, OR

"I am writing this letter of reference for Western Partitions, Inc's fireproofing division led in the field by Ron McCullough. I worked with Ron on the Cancer Center Project at Providence Portland Medical Center. Western Partitions was responsible for fireproofing the 6,000 ton, 495,000 square foot facility. The building was constructed over the top of the existing operating boiler facility and surrounded on three sides with the remainder of the 750,000 square foot running hospital.

As can be inferred from the description above, the construction process was executed in a fish bowl, of sorts, and subject to numerous sequence restrictions to accommodate the ongoing campus operations. Western Partitions was integral to our overall success throughout the complex project. Ron knows his business and ran a tight, orderly ship. He was able to consistently beat intermediate milestone dates to advance the overall schedule including many out of sequence spaces that tied into the existing temporary protection and left areas spotless when they were complete. Fireproofing is a messy business, but Ron's crew diligently installed and maintained temporary protection and left areas spotless when they were

complete. Along with his expertise, Ron simply did what it took to get the job done. He teamed up well with adjacent contractors, and was always a pleasure to work with.

I would not hesitate in recommending Western Partitions and Ron McCullough for future work. Please feel free to contact me with questions or for further information."

Wayne L Morse United States Courthouse – Eugene, OR

"Confirming my conversation, I am happy to give you and Western Partitions, Inc. a very positive endorsement for the excellent job you did at Wayne Morse Courthouse performing the fireproofing system.

You're up front work, getting the submittals and pre-construction communication completed was early and timely. The architect and owner both commented on the well organized presentation.

During installation of the fireproofing, you and your field staff coordinated with me and maintained the project schedule. It is worth noting the 3rd party inspection group also commented on how well the fireproofing installation was accomplished.

If I have the opportunity to work with you and Western Partitions in the future, I know I can count on you."

*Cooper Denson, Sr. Superintendent
J.E. Dunn Construction
(503)806-0136*

ODS Office Building – Bend, OR

"In a sea of mediocrity, Western Partitions stands out with a level of service in the construction industry that is unparalleled. Their ability to perform projects of any size and complexity with the same level of care and consideration while meeting your projects time frame and budget is impressive.

. . . . And you can quote me on that."

*Andrew Larsen, Project Manager
R&H Construction
(541)419-3762*

New Elks Lodge - Everett, WA

"We want to express our appreciation for the performance of your employees on the Elks Lodge project. Their cooperation and communication with us and others on site made them a pleasure to work with."

*Robert Schleiffers, Superintendent
Cobra Construction
(425)737-0817*

Lane Building – Portland, OR

"I was extremely pleased with WPI's Fireproofing performance on The Lane Building. They met the initial schedule and worked with us when there were changes in the scope. WPI was very efficient, effective and provided a clean finished product - which is tough to come by with fireproofing! We would not hesitate to work with WPI's Fireproofing Group again."

*Jason Schaumberg, Project Manager
J.E. Dunn Construction

J and M Service, Inc.

"For over the past sixteen years I have provided contractors nationwide with Equipment, Accessories, and related Services for the specialized industry of Passive Fireproofing.

During this time I have found Western Partitions, Inc. and its crew members to be some of the most proficient and proactive clients I have. Their constant strive to properly maintain and operate this specialized equipment is what allows them to be so successful."
